

KAUDAMU

Latin : Myristica chartacea Gillespie

Family : Myristicaceae

SUGGESTED USES

- Extremely versatile timber
- Suitable for joinery
- Interior paneling
- Mouldings
- Furniture
- Covered flooring
- Light tool handles
- Novelties
- Light construction

PHYSICAL PROPERTIES:

Heartwood is pink to light brown in color. Sapwood is cream to pale brown, darkening on exposure. Texture is intermediate and uniform and the grain usually straight.

Air-dry density averages 580kg/m³. Shrinkage is high.

MECHANICAL PROPERTIES:

Strengths group S6 (green), SD6 (seasoned.)

WORKING PROPERTIES

Kaudamu is easy to saw and plane in the green and seasoned conditions, generally working well and producing smooth, clean-cut surfaces and crisp edges.

CURRENT SUPPLY VOLUME	TYPE	SIZE
